Hopi Farmers Reap Harvests of Corn and Beans

By: Louella N Furcap
the Village Crier Editor

Thanks to the moisture received during the months of June and July. Hopi farmers were thankful and elated as they saw their crops began to grow and now ready for harvest.

For several years, the long drought has hampered the growth of crops and caused frustration for Hopi farmers who practice dry farming and depend heavily on rains. The drought has been extensive and the ground has not received any moisture for several years.

This has been a good season and farmers are happy to harvest their crops although there were challenges of deer and elk eating their crop.

Blessings of rain bring bountiful crop harvests, amidst elk and deer invasions

United States Army Corps of Engineers Complete Mitigation Efforts for Temporary Relief of Flooding at the Polacca Wash

The United States Army Corp of Engineers (USACE) completed mitigation efforts for temporary relief of flood overflow. A channel was dug from the Polacca Bridge for approximately one quarter mile downstream (Southwest).

Long Awaited Project to Install Fiber Optic Cables Will Advance Internet Systems for Telemedicine and other Online Services

By: Ivan L. Sidney, Administrator
First Mesa Consolidated Villages

A recent article in the Village Crier reported of no efforts by the Hopi Tribe to develop plans for reservation business development and increase the yearly revenue, a critical loss by the closure of Peabody Coal Company.

A meeting was called by HTI, with FMCV back in November of 2022, to request for a construction yard to store equipment and supplies for installations of fiber optic cables. This was scheduled to begin in December, 2022 but was delayed and is now scheduled to begin in September of 2023 according to Wayne Taylor, the local Assistant Executive of HTI located in Keams Canyon.

The land set aside for business use was approved by FMCV and supplies and equipment

were delivered. Our village also provided space for the company office and construction water required to replace old time copper communications lines with modern state of the art fiber optic cables. The company, Hylan West based in the Phoenix area is the contractor to construct the new fiber cable on the entire Hopi Reservation.

This long-awaited project will advance our internet systems for wireless, tele-medicine and online services. These fiber optic lines are a must to provide services for our businesses since all business equipment now uses new technology and for other future business developments. The Hopi Reservation, upon completion, will finally catch up to the rest of the technological world with fiber cable.

Our Village takes pride

in continuing to assist with business developments to provide improved services for our people. Our children in

for their children, which is allowing FMCV to provide lands for use.

The land for the establishment of the Nations

pany plans to establish full services for propane at its business site and provide local immediate delivery. The company has

Fiber Optic Cables and equipment stored at First Mesa trailer court yard

our schools and teachers will witness the improved services. Thanks again to our village leaders for providing the lands for all the needed services. It has been their foresight

Gas Technologies, Inc., a Native American owned company based in Navajo, New Mexico at First Mesa was approved and is now in the process of a federal lease approval. The com-

expressed the interest to prioritize hire of our local people to operate the services. Another cold winter is predicted so the immediate establishment of this business must be pursued.

Impassable Road Conditions on BIA Route 10 and Low Mtn Road

By: Ivan L. Sidney, Administrator
First Mesa Consolidated Villages

During the recent downpour of rains, our office received calls from homeowners reporting damaged driveways to their homes. They apparently were calling our local village offices and the Hopi Department of Transportation but received no responses. It was reported that local village offices were requiring payment for the use of equipment purchased by use of CARES Act funds.

HDOT responded that their program is a P.L. 93-638 Contract program and receives funding to only maintain tribally approved road systems. This is understandable with our office, but our local schools must know these tribally approved road systems and bus routes and should have participated in the approval process. We have been receiving reports of unpassable road conditions on BIA Route 10 behind First Mesa. For years, this road has become unpassable especially when the placement of cinder on the road was bladed off. Our Kikmongwi came to our office to personally report the road condition and recommended the placement of gravel or cinder. Residents using this road have experienced difficulty and damage to their vehicles.

When the HAMP Project installed First Mesa Water lines alongside this road without the knowledge and approval of

HDOT, this resulted in requiring a new survey and design to complete the construction. This is a critical setback to our village and especially when the HAMP project violated several approval processes. To date, the Hopi Tribal Council and Administration are silent on these violations, but it is their responsibility for corrective actions. This all must be reported to the village and allow for questions on these issues. Our office will request a village meeting to hear from HDOT and the Tribal Council Transportation Committee.

When our three villages were offered millions of dollars from the CARES Act funds to purchase equipment, our village consolidation should have had proper joint village planning on which equipment will satisfy our needs. Instead, each village purchased backhoe tractors which are primarily used for preparing trenching. The purchase of a road grader would have been the best to maintain our village roads year-round.

Our office also received a request from the Hopi Jr./Sr. High School Transportation Department to repair road damages on BIA Route 60. Some of these roads should have priority for immediate repairs after foul weather conditions. FMCV was able to provide some assistance to homeowners without cost.

Unpassable road conditions at Low Mountain Road

First Mesa Consolidated Villages’ Special Projects Report

By: Wilber Kaye, Staff Assistant
First Mesa Consolidated Villages

Polacca Wash

The United States Army Corp of Engineers (USACE) completed the midterm mitigation for temporary relief of the flooding. (Short-term was the HESCO Barriers.) A channel was dug from the Polacca Bridge for approximately one half mile downstream (Southwest). While the principal work is completed, there are a few conditions that must be resolved:

- The disposition of the sediment and trash piles left by ADOT.
- The maintenance of the channel.
- Securing vehicle access to the channel.
- Fencing and other safety measures to prevent public access to the channel.
- When the long term mitigation phase will begin.

First Mesa Consolidated Villages (FMCV) has asked the Arizona Department of Transportation (ADOT), the Chairman’s Office, and the Department of Natural Resources (DNR) for plans to address these issues. To date, none of FMCV’s inquiries have been answered. MCV will continue to issue weather and flood alerts and has provided additional links for Arizona weather and safety bulletins. FMCV has closed vehicle access to the Pilot channel by creating a berm. The Hopi Tribe signed an agreement with USACE to maintain the channel and other services. FMCV was not part of this agreement, but we have taken these measures to ensure public safety.

PL 93-638

FMCV has made repeated requests to identify which departments within the Hopi Tribe Department of Natural Resources (DNR) are contracted from the Bureau of Indian Affairs (BIA). To date, these requests have not been answered by the Hopi Tribe or the First Mesa Tribal Council Representatives. FMCV was informed that the Hopi Tribe has only contracted Land Operations and their specific area of operation is the Hopi Partitioned Lands (HPL). The Water Resources program receives direct funding from the BIA but is not contracted. All

other DNR programs are tribally funded. We have learned that BIA Natural Resources (BIA NR) currently have projects scheduled in the HPL area, none within any village’s lands.

First Mesa Erosion

FMCV is continuing to work on mitigation for the Mesa erosion. FMCV initiated this project due to the growing concern of mesa block separation (creating voids, sinkholes and widening joints), landslides, and rockfalls. There has been little tribal or BIA involvement with this project. With the initial study and recommendations from the United States Geological Survey (USGS) and the Arizona Geological Survey (AZGS), FMCV will determine best course of action. A public meeting to discuss priorities will be scheduled. (The USGS report was published in the FMCV Village Crier, August 15, 2023, Volume 4, No.12)

Emergency Response Plan

FMCV has taken the initiative to develop an Emergency Response Plan (ERP) for the community of First Mesa. Prior to this, FMCV met with the Community Service Administrators (CSA) along with the Department of Public Safety and Emergency Services Director (DPS & ES) and the Chairman’s Office regarding an Emergency Response Plan (ERP). This meeting did not produce any results other than to provide the Hopi Emergency Response Team (HERT) with a list of assets. Shortly after the meeting, FMCV provided material to the CSA’s and the Chairmans Office for Emergency Management obtained from FEMA and Navajo County to disseminate to their respective villages in lieu of an ERP.

There were several meetings by the group since August 2022; this was FMCV’s first invitation and attendance. FMCV appreciates the Community Service Offices’ attempt at addressing this, but it has been nearly a year since the Emergency Declaration and no plan has been produced. The Public and CSA’s will be given an opportunity to comment on the plan before its signed and approved by resolution.

Rainwater Drainage

Another concern is the rainwater/snowmelt drainage system throughout the community. Concrete drainage and gabions at the main drainage points are not maintained and require cleaning. FMCV submitted a request to the Hopi Department of Transportation (HDOT) on March 29, 2023, in preparation of the monsoon season requesting maintenance of the system throughout the community.

More recently, an informal report was made to ADOT on the condition of culverts and standing water along State Route 264, from mile post 390 to 392. Most culverts were obstructed with sediment and debris. All of the culverts are corrugated metal pipes (CMP), about 36 inches in diameter. Only one location had more than one pipe, but 2 of the three pipes were obstructed and the third was half filled with sediment. We have seen some work on the drainages after heavy rains. FMCV has requested to meet with ADOT regarding the drainage system currently in place to discuss improvements, such as making slopes where rainwater accumulates to drain into culverts and replacing Corrugated Metal Pipes with Concrete Box Culverts or other more efficient drainage systems.

FMCV has not received a response from either HDOT or ADOT if they plan to address these concerns. We have brought these concerns to our Hopi Tribal Council Representatives but have not received any feedback. It will take a joint effort with FMCV, ADOT, HDOT and other tribal departments to improve the current drainage system, beginning from the mesa to the lower elevations. Maintenance is a continuous process which could save lives, property and department time, resources and expenses.

Community

First Mesa Consolidated Villages continues to work on community issues and would like public input on what your concerns are. Other issues include trash (household and bulk), Abandoned Homes (mobile and permanent) and Abandoned/Junk Vehicles; Animal Control; Street Naming; and Village Restoration and Preservation. Please contact infofmcv@gmail.com

See more Photos on Page 6

Upon completion of the temporary flood control mitigation efforts at the Polacca wash, rains hit the area and the temporary channels kept the water flowing downstream and deterred flood overflow. The channel was dug from the Polacca Bridge for approximately one quarter mile downstream. **PHOTO ABOVE: Despite the heavy rainfall, water is now flowing under Polacca bridge. INSET: The Army Corps of Engineers and labor crew along with FMCV Administrator Ivan Sidney, FMCV Consultant Myron Ami and Staff Assistant Wilber Kaye celebrate flood control mitigation efforts.**

Hopi Tribal Council Water & Energy Committee Report

By: Dale Siquah, Hopi Tribal Council Representative
Representing First Mesa Consolidated Villages

Side Rock update:

Tribal Council passed, by majority vote, Action Item 072-2023 DBS&A Work Order for Side Rock Engineering, as recommended by the Water Energy Committee (WEC). The objective was to approve a work order from Daniel B. Stevens & Associates (DBS&A) in the amount of \$339,004 to procure analysis, planning and engineering work to develop a water pipeline from Slide Rock to the villages of Moencopi.

Discussion: According to experts employed for the Little Colorado River (LCR) litigation, the wells located near the Villages of Moencopi, in the near future will not be able to produce sufficient water to meet the domestic water needs of the Villages. In anticipation of the shortage, the tribe has drilled two wells at Side Rock (Grazing Unit #251). The most practical way in which to convey water from wells to the Villages of Moencopi is by pipe. The proposed work order secures the services of the Engineering firm of DBS&A to perform essential planning and engineering needs to develop the pipeline. Cost is \$339,004 and funds to be used are the ARPA funds. The total request is \$339,004 with a small amount of excess for work orders for contingency. Planning and design will determine if the HTPRC approves remaining \$24 million. The total ARPA set aside for the Side Rock Project is 25 million.

- Monthly status of the following is required thru email or hard copy:
 - ◊ Negotiation of ROW: Office of General Counsel (OGC) is taking the lead on the ROW and continues to move toward an agreement.
 - ◊ Preliminary Engineering Report (Cost): HTC recently passed AI # 072-2023 for the amount of \$339.004 to complete the study which will provide estimated costs.
 - ◊ Water Use Agreement between HUC and Moencopi villages: A meeting with Moencopi village will be conducted soon.

Jennifer Hill, PE (Principal Engineer) from DBS&A will oversee funds and complete planning and design. The latest update from Hill on Aug.29, is that she is still awaiting a purchase order (PO) to be processed -no work has been done. The OGC reports that the PO is awaiting signatures and anticipates it will be processed by Friday Sept. 1, 2023.

Hopi Utilities Corporation Grants

WEC convened in a special meeting via zoom on Aug. 29, 2023 where Fletcher Wilkinson from Hopi Utility Corporation (HUC) gave an update on the grant to provide solar power to two existing wells for the Side Rock project and the two new wells to be drilled using the 25 Million ARPA set aside. Wilkinson along with Kendrick Lomayestewa from the Tribes Renewable Energy Program presented their application for a grant from the U.S Environmental Protection Agency, Office of the Greenhouse Gas Reduction Fund. The name of the grant is “Solar for All” and has a closing date of Sept. 26, 2023. March 2024 is the anticipated notification of selections with July 2024 anticipated awards. Funding Opportunity Description (*Copied from the funding notice*): *A. Background: Residential distributed solar generation and energy storage, including rooftop residential and residential-serving community photovoltaic (PV) solar and storage, reduces energy costs for American households, abates pollution from power generation, generates wealth and jobs for local communities, improves public health, and provides resilient and secure power.*

The funds target disadvantaged and low income communities. The Hopi reservation is listed/considered a disadvantage community and qualifies for the grant.

NTTA Tribal Broadband Summit “Pathways to Success”

Tribal Council Reps. Rosa Honani and Dale Siquah, members of WEC are currently attending a summit hosted by Gila River Telecommunication Inc. The first day impressed the importance of educating a work force to install and maintain a broadband system and the different types of systems. We saw

splicing optic fiber demonstrations which requires expensive tools requiring precise measurements and periodic calibration.

I learned workforce training is not really offered in our present higher education system. Many large Broadband companies offer training when their products are purchased. There are also Broadband Boot Camps offered by different entities such as Tribal Resources Center which facilities Fiber Boot camps. This particular Boot Camp offers scholarships which pay for training costs, transportation, meals and lodging.

Hopi Telecommunication CEO Carroll Onsae and HUC General Manager also attended the summit.

During the “Digital Inclusion 101: Understanding & Increasing Digital Equity in Your Community” presentation, we learned the importance of organizations such as National Digital Alliance and AMERIND Critical infrastructure which have a wealth of information on digital inclusion and equity. An important component of digital equity is a “Digital Navigator” Tyler Smith was highlighted during the presentation in the main conference. He, along with a group from Jemez Pueblo, are Digital Navigators.

I copied their job description form the internet. It explains their purpose and the services they provide better than I can: *POSITION SUMMARY:*

The Digital Navigator provides individualized or small group assistance to community members who need affordable home internet service, affordable internet capable devices, and/or coaching in introductory digital skills in order to become effective home internet users. This assistance is provided primarily by voice telephone but may also include email, text, video chat, and other communication methods that work for the learner. The Digital Navigator’s work is part of the Jemez Pueblo Tribal Network’s efforts to bridge the technology gap and equitable internet access for the community members of Jemez Pueblo. This job description indicates, in general, the nature and levels of work, knowledge, skills, and other essential functions expected of the incumbent. It is not designed to cover or contain a comprehensive listing of activities, duties or responsibilities required of the incumbent. Incumbent may be asked to perform other duties as required.

I sat with Smith after lunch and he explained to me how he works with members of his tribe and meets them where they’re at and helps with devices they have. Some people need help with phones, others are students from elementary to higher learning who need help with laptops. He meets them at home, phone, or at the youth and Elderly centers. After hearing these digital navigators I realized how much the HTC can use their help with our laptops and phones for Zoom.

Digital Navigators are important to Broadband providers since it helps individual to become comfortable using their services and are potential customers. Navigators can collect data for providers to help them design and evaluate their systems to provide the right services for customers.

Attending the “NTTA Tribal Broadband Summit” gave me insight and general understanding of what it takes to create Broadband services for our community. It gave examples of how tribes and rural communities have been successful and continue to improve systems to give customers what they need. With this knowledge I plan to see how HTC can work with HTI to improve our Broadband system providing Hopi Citizens the service they need and deserve. I know how to ask the right questions to HTI.

Lower Colorado Water Negotiation

The Navajo Water Negotiation Legal Team and Hopi Water Negotiation Legal Team continue to meet periodically. The most recent meeting was via zoom on Aug. 28, 2023. They continue to address issues that divide us most and make offers and counteroffers to produce a product which has substance enough to present to HTC. The Hopi Water Rights Committee continues to meet and receives updates on the legal team’s progress and provide direction.

Transportation Committee Report

Transportation Committee Chairman HTC Rep. Herman Honanie reported on the Transportation Committee’s recent trip to Region in Phoenix. At the meeting they learned of the Hopi Tribal Government’s finances. The Hopi Tribe is behind in providing audits to region so the Tribe is on level 2 sanctions.

Lorraine Walker, BIA Region, was invited to HTC by the Transportation Committee. She presented information and said Hopi is currently on level 2 sanctions and at the verge of reaching level 3. Walker said more than likely Hopi will be placed on level 3.

She emphasized the importance of communicating, and mentioned the difficulty communicating with Hopi. The Tribe must take positive measures to complete it’s audits and start communicating with region.

A letter was written By FMCV Rep. Dale Siquah requesting to place this issue on the agenda for discussion and possible action.

Water & Tribes Initiative/Colorado River Basin presentation to Tribal Council July 27, 2023

This group was given a directive by HTC to come back to HTC and present a plan on what and how they plan on helping the Hopi Tribe in infrastructure for drinking water and waste water. A zoom meeting on will happen with this group and departments to go over their proposal and present it to HTC on September 28, 2023.

1. Assist Tribe to enhance water resource capacity:
 - a. Need/and or opportunity to upgrade Tribe/Village water related infrastructure
 - i. Develop a comprehensive infrastructure plan
 - ii. Take advantage of unprecedented federal funding for infrastructure projects
 - b. Enhance Hopis water resources program
 - i. Provide field-based training
 - ii. Support recruitment for applicants for water-related positions
 - iii. Revise and update water ordinances, codes, and regulations
 - iv. Support water resource planning
 - b. Clarify Hopis vision for water
 - i. Existing capacity to achieve the vision
 - ii. How to bridge any gap

Land Commission

The Land Commission and WEC members plan to drive to Clear Creek Ranch to do an onsite visit to land included in a proposal to create a Transportation Hub. The Land Commission and Water Energy Team also intend to invite Governor Hobbs to meet with the Hopi Tribal Council, TBA

September, the Feasting Moon is the month for thw Maraw tikive (Women’s society dance). The fresh crops of corn, melons, vegetables, peaches and wild greens are picked for feasting. Corn is roasted or made into fresh cornbread or cooked while wrapped in the green husk. In addition to fresh produce, meat (usually mutton) is cooked and is either roasted, boiled into stew or fried. This is a month of happiness and appreciation for our crops.

Hopi Tribal Council Report

Investment Oversight, Gaming Committee and Transportation Task Team

By: Wallace Youvella, Jr., Hopi Tribal Council Representative
Representing First Mesa Consolidated Villages

Hopi Tribal Council:

- Action Item #070-2023** – Authorize the transfer of an estimated \$5.7 million of expenditures from the Coronavirus Relief Fund (CRF) to the American Rescue Plan State and Local Fiscal Recovery Fund (FRF).
The Action Item basically requests that alleged unauthorized expenditures that the CARES Team spent beyond the awarded CARES amount of \$85.5 million, be replaced with American Rescue Plan Act funds awarded to the Hopi Tribe. The Action Item was not acted upon, however there are many questions surrounding why such a large amount of funds was spent beyond the awarded amount. Where were the funds pulled from to cover the unauthorized expenditures? Who was responsible for the bookkeeping? Hopi Tribal Council is led to believe, by the Finance Director, that because the U.S. Treasury changed the dates of CARES funds to be expended, led to one of the reasons why there was this problem. However, the U.S. Treasury extended the date which meant that the CARES Team had more time to spend the funds and allow for better planning and spending. Hopi Tribal Council is being asked to approve this over expenditure of nearly \$6 million dollars be paid for by the ARPA funds, without an audit which would uncover any possible negligent or unauthorized acts. The Action Item may possibly be revisited in Sept. 2023.
- Action Item #083-2023** – To support and approve a new 638 Contract with the Bureau of Indian Affairs to fully remediate the Tuba City Dump (TCD) that consists of removing the entirety of the waste contents and disposing of the waste at a site off the Hopi Reservation location. The Action Item was Passed and approved.
The time to perform this task will be considerably long but to ensure it is properly done the necessary duration of time is needed. The amount of Uranium at the TCD is approximately six times the allowable limit, which poses a serious safety hazard. The Director of the Dept. of Natural Resources will lead the project for the Hopi Tribe.
- Action Item #075-2023** – To contract Walker & Armstrong, LLP, to provide accounting and audit preparation services for Fiscal Year ending Dec. 2021. The Action Item was Passed and approved.
There was much discussion and questions regarding this Action Item which was actually presented previously by the Finance Director and defeated. Now it is known that the Hopi Tribe is in Level II Sanction Status due to the lack of audits for years 2020, 2021 and soon to be 2022. When the Director of Finance previously presented the Action Item, he did not tell the Hopi Tribal Council of the alarming situation that the Hopi Tribe finds itself in currently. The Hopi Tribe has used Walker & Armstrong for approximately ten years with arguably little to no improvement in the Finance Department. However, due to the serious situation that the Hopi Tribe finds itself in with lack of audits and Level II Sanction Status, the Action Item was approved but with direction that audits are to be of the highest priority and completed expeditiously. It was also expounded upon that the Hopi Tribe communicate with the Bureau of Indian Affairs on a constant basis to relay the progress of completion of audits.

Investment Oversight Standing Committee:

- Unfortunately no quorum was attained due to other members having schedule conflicts. Three members present. The next meeting is set for Sept. 11, 2023.

Gaming Committee:

- Unfortunately no quorum was attained. Two members present. Rescheduled meeting set for August 30, 2023.
- Prior to departing due to the lack of quorum, we were notified that Leadership from the Tachi Yokut Tribe of the Santa Rosa Rancheria of California were available to inform the Hopi Gaming Committee of their ability to form a partnership in bringing Gaming to Hopi. Due to the lack of a quorum, Vice Chair Secakuku and Rep. Youvella, Jr. were only able to listen to the presentation in an informal meeting, with no action taken.
- Notes for the rescheduled meeting will not meet the deadline for this publication. Notations will be reported in the Sept. 2023 Report.

Transportation Task Team:

- Unfortunately no quorum was attained. Three members present. The next meeting is set for Sept. 11, 2023.
- There was a verbal report to Hopi Tribal Council on August 22, 2023. Transportation Task Team (TTT) Chair Honanie informed the Hopi Tribal Council that the TTT had met with the Bureau of Indian Affairs Officials due to the possibility of funds being withheld. The TTT was notified by the Hopi Transportation Director, in May, with information that due to the lack of submittal of audits by the Hopi Tribe, there was a likelihood of funds being withheld from the program.

Letter to the Editor

Dear Editor,

The adaption to changing conditions is a condition of a survivalist, and that has been the nature of our race for hundreds of years as native people. This depends on the simple, yet fundamental question about attitude to cope with problems of the modern world. We need, above all, to see them clearly and analyze them scientifically with a long term perspective in respects to our values and the promise to ensure our children will have a prosperous future.

As a tribes , we own very little, our primary business is we lease almost everything. I’m going to share with you conceptually what I’m referring to when I talk about a large capacity of potential revenue for the adjoining but independent tribes of the Hopi and Navajo nation.

In 1784, the first Industrial Revolution begin with steam and water, plus the development and use of mechanical productions. The second industrial revolution was with the development of electricity and the mass production using the assembly line in 1870. The third industrial revolution came in 1969 with the first programmable computer and the use of electronics. It was the beginning of the digital age, we are currently in the fourth industrial revolution with robots learning from humans. Biometric development is at the forefront of this next revolution, This next revolution is the birth of artificial intelligence, cyber technology, physical systems and applications. This is where I believe the Hopi and Navajo nation can begin developing the physical matter of this technical revolution.

In 2021 the national news begin reporting on a metal shortage, and so alternative metals were being sought. One of these metals is called poly silicone. Poly silicone is the substance in which many of the car parts we have today are made of and the substance of solar panels. It is also the substance use for semiconductor development.

Semiconductor development is a national security priority. Both the military and the private sector are seeking this material and it’s raw form. It can run anywhere from \$10-\$15 per kilogram. But in its developed state, one cylinder of the stuff that has been developed through a process of polishing and layering, is worth \$17,000 per wafer which is about 6 to 8 inches and as thin as a card stock paper, or a traditional business card.

There are grants and guaranteed loans available for this program. The grant for this kind of enterprise includes education and Community development money to bring people to this industry and develop another generation to keep the process of production moving. I other words, the stuff is made of sand to create the crystals. The other substance is coal which is from black Mesa mines. Coal and sand are minerals the Navajo nation owns according to the 1971 Supreme Court ruling. We currently have an abundance of both of this these raw materials right now on the Hopi and Navajo nations and we have an opportunity through many grants totaling in the numbers of 35 billion and there is guaranteed loans up to 75 billion to enter this industry that is available within the United States. This \$400 billion industry can potentially be an industry, the Hopi and Navajo nation can develop and participate in.

By: Neal Riggs
Navajo Nation Tribal Member

Youvella Hopi Council Report Continued

As reported in last month’s report there was a meeting with the Transportation Task Team, HDOT, Hopi Realty, Hopi Finance Dept., and the Western Region Office. During that meeting in July, Lorraine Walker gave a report on the status of the lack of audits by the Hopi Tribe.

For the August TTT Report to the Hopi Tribal Council, Chair Honanie invited Walker of the Bureau of Indian Affairs to attend and give a report as well as have the Hopi BIA Superintendent present. During the report by Walker, it was communicated that the Hopi Tribe is currently in Level II Sanction Status with The Hopi Tribe being behind two years in audits. Those years that Hopi has not submitted audits for are 2020 and 2021. Hopi will be an additional year behind on Sept. 4, 2023 when the 2022 audit is due. Presently, the Hopi Tribe is facing the possibility of a Level III Sanction Status and that could be handed down at any time.

Level II Sanction Status does currently present some challenges for funding of departments at this time and departments are feeling the effects. A Level III Sanction Status would be devastating to the Hopi Tribe as the BIA could and may begin the process of pulling back 638 Programs to the BIA.

The Hopi Tribal Council amended and passed Action Item #075-2023, on August 21, 2023, which allows Walker and Armstrong to assist the Hopi Tribe’s Finance Department to complete audits for 2021 and 2022 in year 2024. This would allow for two audits to be completed in one year, as opposed to just one audit per year as was requested by the Finance Dept.

Jim Davis, the Hopi Tribe Director of Finance, reported that the 2020 audit is being worked on and should be completed within the next few months. It was stated by a number of Representatives and Chairman Nuvangyaoma that Davis and the Finance Department need to complete these audits expeditiously. Davis and/or Hopi Leadership are to communicate with the Bureau of Indian Affairs on a frequent basis.

Due to Lack of Funding, Hopi Burial Assistance is Currently Unavailable

In an email dated Aug. 21, 2023 to all Hopi Tribal employees, the following Burial Assistance announcement was made:

“It is with regret that the Hopi Department of Social Services announces that due to lack of funding, there will be no Burial Assistance available as of August 2023, until further notice. Any questions, please free to contact either Verlene Gashweseoma, Social Services Representative at 928-401-7156 or Lorencita Joshweseoma, Director 928-221-4426.

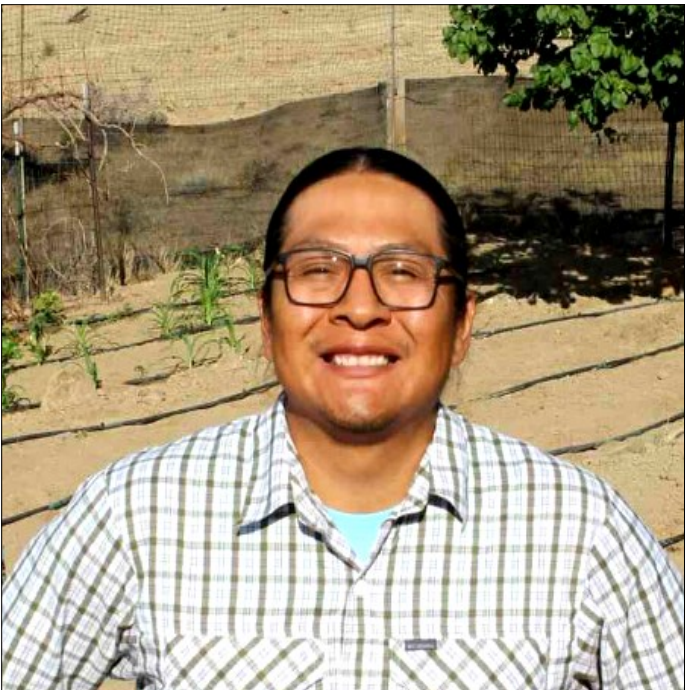

First Mesa Consolidated Villages Tribal Council Representatives REPORT Card

FMCV Tribal Council Representatives are required to make Monthly Reports and Updates to the First Mesa Community. However, due to past gathering restrictions, Reports are published in the Village Crier. Below is a recap of reports submitted by your Representatives, beginning January 1, 2021 to Present.

Ritchie Sahneyah Intern Finds Inspiration at Crow Canyon

Crow Canyon’s collaborative and inclusive approach means a lot to Indigenous people who come to Crow Canyon to develop their education and careers, like Ritchie Sahneyah, Hopi Tribe, Village of Tewa, Tobacco Clan. He served as an American Indian Initiatives intern with Crow Canyon in 2022 and is pursuing his bachelor’s degree in Anthropology. Coming to Crow Canyon was an eye-opening

experience for Ritchie: “Growing up, I didn’t have much exposure to ancestral sites outside of the reservation. I knew about places in the Grand Canyon and National Parks, but never knew there was a larger landscape beyond that, especially in the Mesa Verde region,” he shared. Ritchie had the opportunity to be part of a range of Crow Canyon activities and projects, including a Cultural Explorations scouting trip with Hopi scholars at an area known as The Lands Between, named for its position between Bears Ears and Canyons of the Ancients National Monuments. “We went to a few sites with rock art panels and being there, hearing their knowledge of different depictions was very inspiring and gave me a deep understanding of my own culture and the history of the area,” said Ritchie. “The experience with Crow Canyon allowed me to feel connected to my culture all while learning how traditional knowledge can teach us so much more about the past, present, and future.” Ritchie’s experience has inspired him to do more to teach about his Tribe’s culture and pursue studies in ethnoarchaeology in the Southwest region: “My experience with Crow Canyon helped me see how rich our culture is and how far it spreads. I want to help preserve that and encourage young people in my community to become interested and engaged in careers in archaeology and anthropology.”

From P3, Special Projects Report Photos:

Another concern is the rainwater/snowmelt drainage system throughout the community. Concrete drainage and gabions at the main drainage points are not maintained and require cleaning. FMCV submitted a request to the Hopi Department of Transportation (HDOT) on March 29, 2023, in preparation of the monsoon season requesting maintenance of the system throughout the community.

Jr. Sr. High School 2023-2024 Fall Sports Schedule

Bus Safety
Reminder

As we start the 2023-2024 school year, please remember to follow all bus safety rules. Drivers, help keep all our kids safe by always stopping and never passing a bus when it has its lights flashing and stop sign out. Let's have a great year Hopi!

GO BRUINS

If a bus has it's stop sign out it is either loading or unloading a student. It is telling you to stop and look for students. Just STOP, IT'S THE LAW.

This can not be shared enough

We Are Pleased to Announce

NAU Office of Native American Initiatives, Institute for Native-Serving Educators Director ...

Darold H. Joseph, Ph.D.

Darold H. Joseph, Ph.D., is Paa-Is-wung-wa (Water Coyote Clan) from the Hopi Village of Lower Moenkopi. He is a son, brother, uncle, husband, father, and grandfather to his family. His father's family represents the Nuva-wung-wa, or Snow Clan, from the Village of Shungopavi. Dr. Joseph was raised on Hopi and graduated from Tuba City High School. He received his dual bachelor's degree in elementary and special education and his master's in Educational Leadership with an emphasis in Disability Studies, both from Northern Arizona University. He earned his Ph.D. in Special Education with a minor in Language, Reading, and Culture from the University of Arizona. Dr. Joseph also serves as an Assistant Professor in the College of Education.
